## Legend

<u>STOP:</u> Damage to the vehicle may occur. Do not proceed until process has been complied with.

**OPERATOR SAFETY:** Use caution to avoid risk of injury.

<u>CAUTION:</u> A process that must be carefully observed in order to reduce the risk of damage to the accessory/vehicle and to ensure a quality installation.

<u>TOOLS & EQUIPMENT:</u> Used in Figures calls out the specific tools and equipment recommended for this process.

<u>**REVISION MARK:**</u> This mark highlights a change in installation with respect to previous issue.

SAFETY TORQUE: This mark indicates that torque is related to safety.

#### Procedure

Care must be taken when installing this accessory to ensure damage does not occur to the vehicle. The installation of this accessory should follow approved guidelines to ensure a quality installation.

These guidelines can be found in the "Accessory Installation Practices" document.

This document covers such items as:-

- Vehicle Protection (use of covers and blankets, cleaning chemicals, etc.).
- Safety (eye protection, rechecking torque procedure, etc.).
- Vehicle Disassembly/Reassembly (panel removal, part storage, etc.).
- Electrical Component Disassembly/Reassembly (battery disconnection, connector removal, etc.).

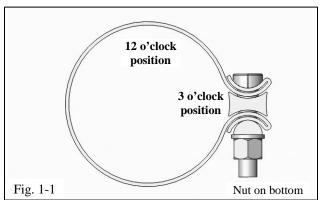

Please see your Toyota dealer for a copy of this document.

# 1. Installation.

- (a) Make sure the vehicle's tail pipe is free from dirt and debris.
- (b) Remove the exhaust tip from the box and set it on a soft surface to prevent scratching.

(c) Locate the bolt of the clamp on the right side (3 o'clock position) with the nut on the bottom (Fig. 1-1 & Fig. 1-2).

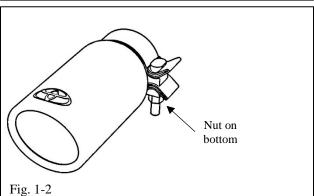

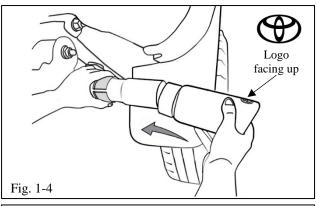

Fig. 1-3

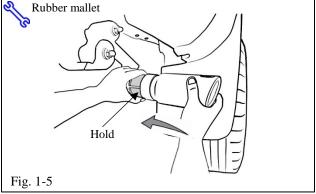

(d) Place the spacers on the exhaust pipe 185mm from the tip (Fig. 1-3).

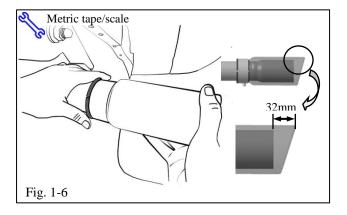

(e) Slide the exhaust tip over the tail pipe with the logo up (Fig. 1-4 & Fig. 1-5). (1) If necessary, a rubber mallet may be used

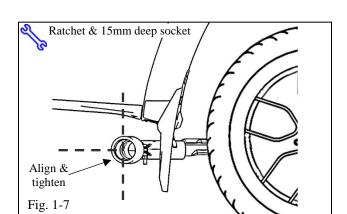

to aid installation.

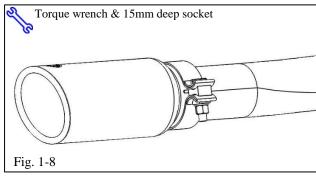

(f) Continue sliding the exhaust tip over the tail pipe for an approximately 32mm distance between the end of the tail pipe and the end of the exhaust tip (Fig. 1-6).

(g) Once the tip is positioned correctly and the alignment seems accurate, tighten the clamp nut making sure the bolt remains in a vertical 3 o'clock position (Fig.1-7).

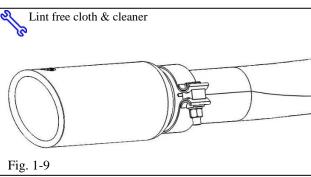

(i) Wait 5 seconds, then torque the nut again.

(j) Clean exhaust tip with glass cleaner or approved cleaner and non-scratching cloth (Fig. 1-9). TOYOTA TACOMA 2016 - Checklist - these points MUST be checked to ensure a quality installation.

Check:	Look For:
Accessory Function Checks	
Correct part number installed	Verify part number on package
Nut torque	Complete torque audit sheet
Clamp alignment	Clamp oriented with nut down, facing the front of the vehicle
Tip alignment	Toyota logo facing up
Vehicle Function Checks	
Rattle or vibration	Start engine and ensure no rattles or vibrations are present
	•
Vehicle Appearance Check	
After accessory installation and removal of protective cover(s), perform a visual inspection.	Ensure no damage (including scuffs and scratches) was caused during the installation process.
	(For PPO installations, refer to TMS Accessory Quality Shipping Standard.)
