INSTALLATION INSTRUCTIONS

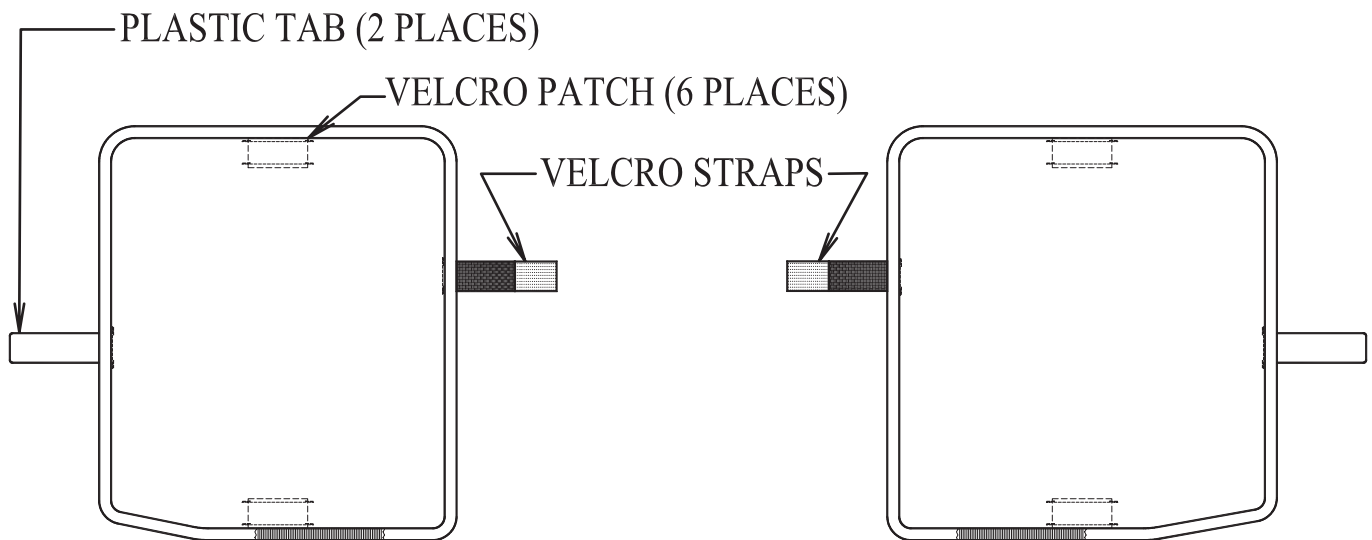

Rear Carpet Floor Mats

APPLICABLE MODEL : 2012 SCION iQ

Package Contents:

REAR CENTER

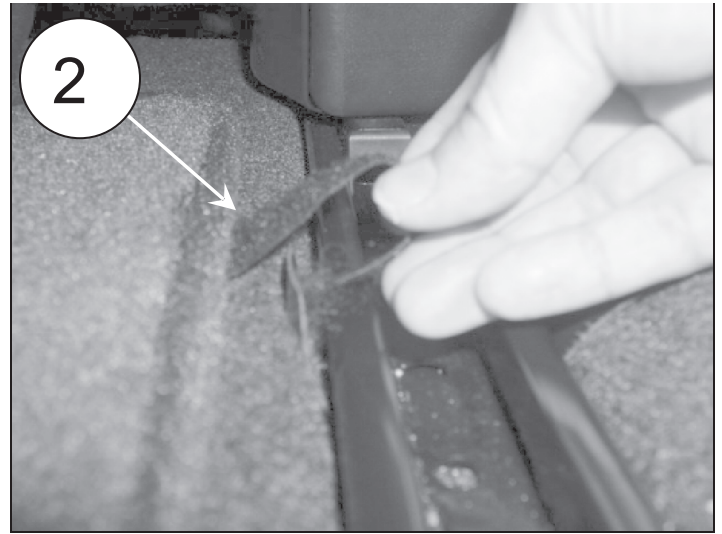

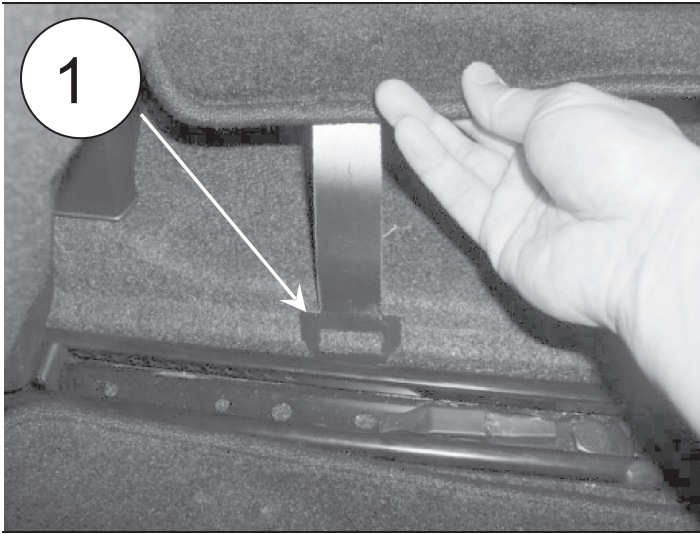

REAR LEFT

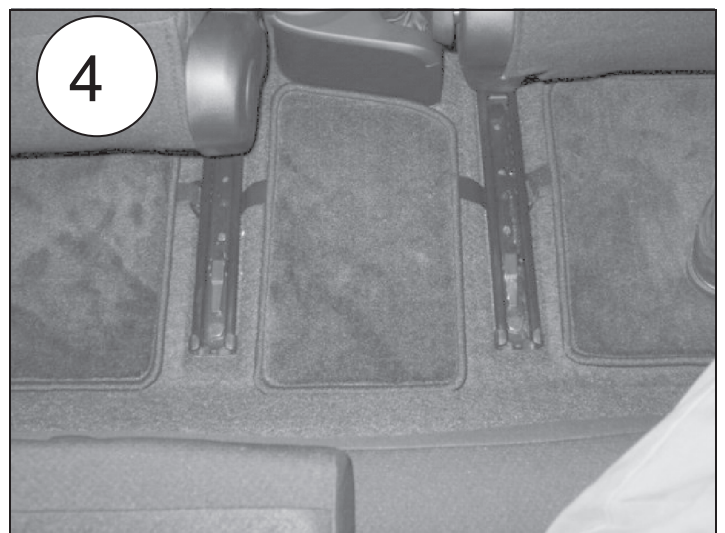

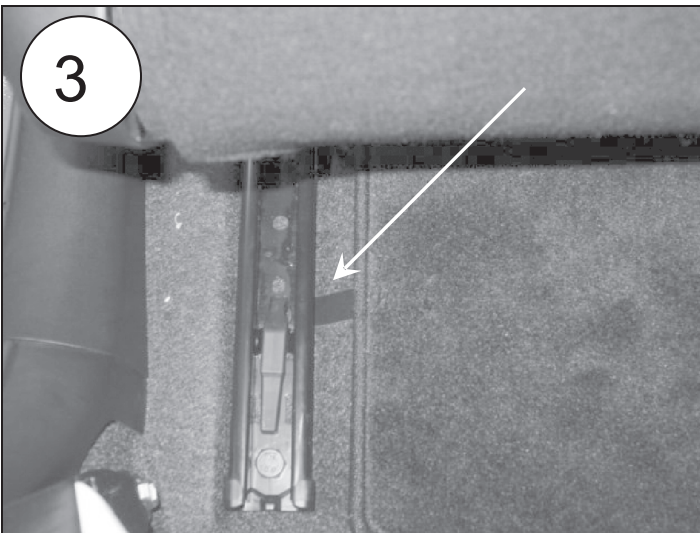

REAR RIGHT

Note: The rear floor mats are equipped with black plastic straps that are designed to be tucked under the rear seat rails and fastened with Velcro straps to hold the mats together in place.

- 1) Place the Rear Center Mat on the rear center floor in between the inner seat rails. Tuck the Plastic Buckle Straps under the seat rails on both sides of the mat.
- 2) Place the Rear Left Mat on the rear LH floor between the seat rails of the Driver Seat with the mat's Velcro Strap lined up to the Rear Center Mat's Plastic Buckle Strap, which is tucked under the seat rail. Loop the Velcro Strap through the Plastic Buckle Strap's opening and tighten the Velcro Strap until both mats are securely joined together and retained by the seat rail.

- 3) Tuck the Rear Left Mat's outer Plastic Tab under the outer LH seat rail. Press the mats into the vehicle floor to ensure the mats' Velcro Patches attach to the floor carpet.

- 4) Repeat the above step for installing the Rear Right Mat on the rear RH side.
